

**Did you know Franklin Control Systems offers one of the most advanced VFDs and selection tools in the industry?**

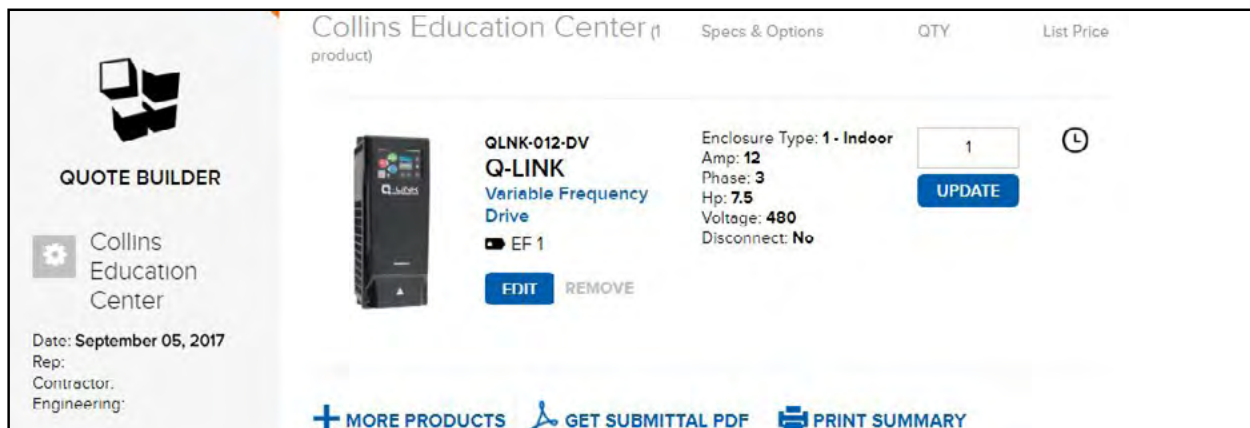

**The Q-Link VFD is connected**

The new Q-link Variable Frequency Drive provides a revolutionary user experience through its intuitive smartphone app. The Q-link connects to your smartphone via Bluetooth® and allows for guided start-up, automated reports, in-app support, and more. It provides an array of inputs and outputs, including damper control. Native communications include BACnet and Modbus. The Q-link uses R<sup>3</sup> Filtering – a sophisticated filtering algorithm – to reduce harmonic distortion and provide equivalent performance to an AC line reactor, without the added cost.

To watch a video of the Q-Link, [click here](#).

**franklin-controls.com quote builder tool**

Select a controller, size it to your motor, and tag it for its intended application. Add all the controls you need for the job, and the quote builder will automatically generate a submittal or Email a summary with the click of a button. An unlimited number of quotes can be created and accessed at a later date. The iOS companion app allows users to build quotes in the field and access them in the office, or vice versa. Create an account and get started today at [www.franklin-controls.com/hvac](http://www.franklin-controls.com/hvac).
